

## Insert Data Database

1. Gunakan perintah **insert** untuk memasukkan data ke dalam tabel.

Contoh :

```
mysql> insert into mahasiswa values
-> ('1414505050','wahyudin','jl.ciputat raya','08124456456');
Query OK, 1 row affected (0.09 sec)

mysql> insert into mahasiswa values
-> ('145632566','siti andini','jl.pamulang indah','0812685686');
Query OK, 1 row affected (0.03 sec)
```

```
mysql> insert into matakuliah values
-> ('040BS021','BASIS DATA 1','2');
Query OK, 1 row affected, 1 warning (0.05 sec)

mysql> insert into matakuliah values
-> ('040PG023','REKAYASA PERANGKAT LUNAK','3');
Query OK, 1 row affected, 2 warnings (0.06 sec)
```

2. Gunakan perintah **select** untuk menampilkan data pada tabel

Contoh:

```
mysql> select*from mahasiswa;
+-----+-----+-----+-----+
| NIM      | nama      | alamat      | no_telp    |
+-----+-----+-----+-----+
| 145632566 | siti andini | jl.pamulang indah | 0812685686 |
| 1414505050 | wahyudin   | jl.ciputat raya   | 08124456456 |
+-----+-----+-----+-----+
2 rows in set (0.00 sec)
```

```
mysql> select*from matakuliah;
+-----+-----+-----+
| kode_matkul | nama_matkul | sks |
+-----+-----+-----+
| 040BS0      | BASIS DATA 1 | 2 |
| 040PG0      | REKAYASA PERANGKAT L | 3 |
+-----+-----+-----+
```
